## Absolute Flat with Narrow Boundary Design

Differentiating from old scanners, the absolute level scan surface with narrow boundary design of XT5830 HS makes scanning of materials easily by sliding out materials from a scanner bed after scanned. The unique and affinity design of XT5830 HS conforms to the human beauty engineering, also makes scanning become easier and saves more work time.

## 1200 dpi Optical Resolution

Equipped with CIS and 1200 dpi optical resolution, XT5830 HS is sufficient for processing scans of archived files and books in offices.

## Fast Smart Button for an Easy Scan

A fast scan button is a smart button which enables users to start a scanning process immediately by touching a button. Set up by software, a fast smart button can fast and easily carry out functions such as scanning, printing, OCR and emailing, enhancing work efficiency and meeting with customers' needs.
